### **A Growing Force: Civil Society's Role in Asian Regional Security**

*Edited by Rizal Sukma and James Gannon*

East Asia is undergoing a remarkable transformation, but at the same time it faces an increasing number of potentially destabilizing security challenges. While there has been growing attention to the need for governmental cooperation to make the region more secure, much less attention has been paid to what is happening outside of official circles. Yet nongovernmental organizations (NGOs) in the region have, in fact, quietly been playing a greater role in responding to security threats. In this volume, authors from the region explore how NGOs are becoming a growing force in five areas—piracy, disaster relief, human trafficking, health, and climate change—to shed light on how they are helping to make East Asia more secure and on the potential for civil society to serve as a catalyst for deeper regional cooperation.

### **New Challenges, New Approaches: Regional Security Cooperation in East Asia**

*Edited by Tadashi Yamamoto and Koji Watanabe*

Since the end of the Cold War, new nontraditional security threats have risen in prominence. Challenges related to issues such as nuclear development, terrorism, peace building, and piracy increasingly require regional cooperation due to their cross-border nature. While the countries in East Asia are embarking on the process of institutionalizing patterns of regional cooperation, more attention needs to be paid to creating institutions that are able to address these nontraditional security issues. In this volume, the authors explore new challenges related to nontraditional security threats, analyze the capacity of existing regional mechanisms to deal with them, and offer recommendations on the necessary steps to create a more secure region in today's world.

## **A Pacific Nation: Perspectives on the US Role in an East Asia Community**

*Edited by Mark Borthwick and Tadashi Yamamoto*

Historic shifts within East Asia have driven efforts to build up regional institutions. Despite its longstanding ties to the region, the United States has been largely absent from these efforts until recently, when American officials declared that the United States is “back in Asia” and began a flurry of activities to strengthen US involvement in the region’s emerging institutions. Many questions remain, however, about the role the United States will ultimately play in the evolving regional architecture and how the region will react to this. In this volume, experts from Asia and the United States explore the latest changes in US involvement in regional affairs and analyze the region’s divergent perspectives on the role that the United States should play in a new East Asia community.

## **An Enhanced Agenda for US-Japan Partnership—Working Paper Series**

A JCIE team of up-and-coming policy experts studied relatively unexplored areas—outside of the traditional realms of hard security and trade—where greater US-Japan cooperation and coordination can help revitalize bilateral partnership and complement ongoing efforts to strengthen the alliance. The US-Japan Papers present the findings of several members of the team.

“An Enhanced Regional Architecture for East Asia: Managing Globalization, Power Transition, and Domestic Fragility,” *Satoru Mori, Professor, Hosei University*

“US-Japan Cooperation on the Reform of International Organizations,” *Philip Lipsky, Assistant Professor of Political Science, Stanford University*

“A New Framework for US-Japan Development Cooperation,” *James Gannon, Executive Director, JCIE/USA*

“Freedom of Navigation and the US-Japan Alliance: Addressing the Threat of Legal Warfare,” *Tetsuo Kotani, Special Research Fellow, Okazaki Institute*

“Revitalizing US-Japan Collaboration on Global Health,” *Eriko Sase, Lecturer, Graduate School of Medicine, University of Tokyo; Susan Hubbard, Senior Associate, JCIE/USA*

“The Rise of China and the Changing Regional Security Architecture,” *Ryo Sahashi, Associate Professor, Kanagawa University*

## Lancet Japan Series

JCIE partnered with the renowned British medical journal, the *Lancet*, to publish a special series on Japan, which was released in September 2011. The series, “Japan: Universal Health Care at 50 Years,” examines lessons learned from Japan’s health system, which achieved universal health insurance coverage relatively quickly after the devastation of World War II and today enjoys some of the world’s best health indicators. In addition to garnering considerable attention internationally, a Japanese translation of the series sold over 3,000 copies.
